PremiumOne™ Disc Brake Rotors

OE engineered technology and patented design put a new spin on brake rotor performance.

At first glance, you can see they're something special. ATE PremiumOne™ Disc Brake Rotors have a number of features that set them apart from the ordinary. They offer real advantages and benefits to brake technicians and their customers:

Patented RotorLife™ wear indicator shows when the rotor needs replacement

MetaCote™ protective coating helps resist salt, dirt and corrosion

OE engineered brake system technology provides original equipment quality, fit and performance

ATE PremiumOne™ Disc Brake Rotors

Original equipment quality with premium features that add convenience and enhance performance.

Features

Patented RotorLife™ wear indicator

The wear indicator's interlaced elliptical grooves are machined into the rotor face at complimentary angles.

The MetaCote™ protective coating formulation is cured at approximately 572°F. No grease or oil to remove.

Application specific design is engineered to tighter tolerances than rotors that take a "one size fits all" approach.

Benefits

Helps technicians and vehicle owners gauge rotor thickness at a glance, and notice when they are due for replacement.

Groove design enhances dissipation of heat and gases to reduce brake fade, extend pad life, and looks great with cast spoke wheels.

Helps protect against road salt, brake fluid and other corrosives – sheds water and dirt for clean appearance behind cast spoke wheels. Reduction in overall installation time.

Fits and performs like or better than the original equipment it replaces – provides added value and convenience for brake technicians and their customers. No machining needed.

The ATE Advantage

Innovative technology. First quality materials. Expert product and process engineering. ATE brake parts for the aftermarket are made to a higher standard than

conventional replacements. ATE is the brand of Continental Teves, one of the largest original equipment brake system manufacturers in the world.

Years of experience and insight gained from serving every major vehicle producer are invested in every ATE brand product.
